Bed Bug Preparation for Hotels and Motels

1. Unplug all electrical devices in the room
2. Remove all bedding and laundry immediately. Remove all items from on top of and inside of all dressers, night stands, coffee tables and end tables.
3. Please leave the mattress and box spring as undisturbed as possible before our first treatment
4. Call Keystone Pest Management to schedule service
5. The mattress and box spring will need to be removed and discarded. We recommend you seal the mattress and box spring in plastic before removal from facility. This needs to be done before our second treatment can be performed.
6. There will be three treatments and monitoring
7. The room needs to be deep cleaned at least 48 hours after the third treatment, then call our office for an inspection and a final liquid application
8. Bed Bug covers should be applied to all new mattress's and box springs that our brought back into the room after treatments are complete
